

# Heuristic Evaluation: Exercise

**Human Computer Interaction** 

Luigi De Russis

Academic Year 2024/2025

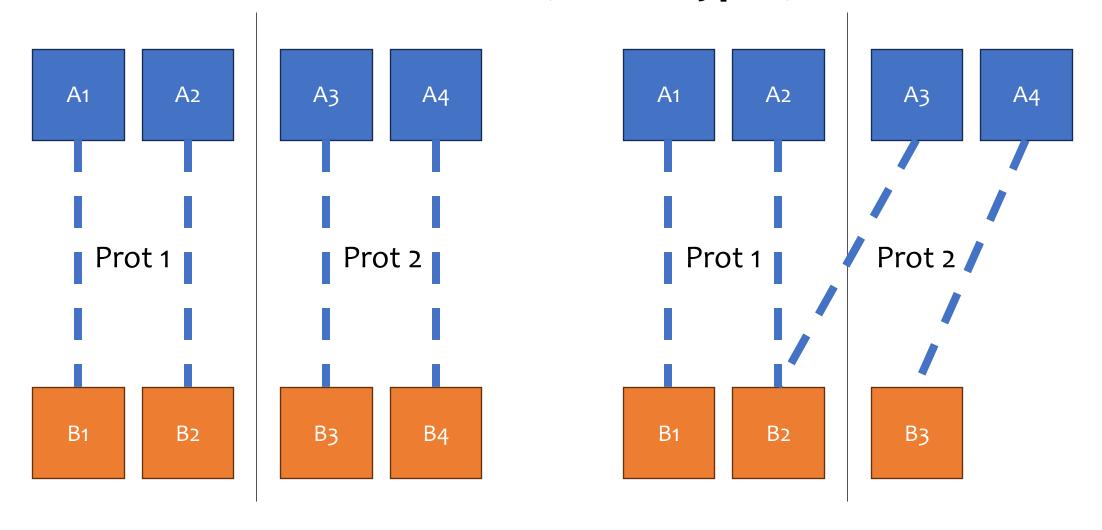

## **Administrativia**

- Assignment 3 is out
  - o Due: November 26 EoD
  - o Individual assignment!
- Last two weeks and it <u>cannot</u> be changed after the deadline
  - o It will be evaluated as you submit it

## Administrativia: Evaluators, Prototypes, Teams

## Goal

- Conduct an individual heuristic evaluation on a low-fi prototype from the 2022 edition of the course
- Share results with the class and reach an agreement

## **Recap: Phases of Heuristic Evaluation**

- 1. Pre-evaluation training
  - Give evaluator information about the domain and the scenario to be evaluated
- 2. Evaluation
  - Individual
- 3. Severity Rating
  - First, individually
  - Then, aggregate and find consensus
- 4. Debriefing
  - Review with the design team

# Recap: Evaluation (I)

- Define a set of tasks, that the evaluators should analyze
- For each task, the evaluator should step through the design several times, and inspect the UI elements
  - On the real design, or on a preliminary prototype
- At each step, check the design according to each of the heuristics
  - o 1st step, get a general feeling for the interaction flow and general scope
  - o 2<sup>nd</sup> step (and following), focus on specific UI elements, knowing where they fit in the general picture

## Recap: Evaluation (II)

- Where problems may be found
  - A single location in the UI
  - Two or more locations that need to be compared
  - Problem with the overall UI structure
  - Something is missing
    - May be due to prototype approximation
    - May still be unimplemented

#### **Exercise**

- Target prototype: RealDeal
  - Flow diagram: <a href="https://polito-hci-2023.github.io/materials/slides/07b-exercise/realdeal-prototype.jpg">https://polito-hci-2023.github.io/materials/slides/07b-exercise/realdeal-prototype.jpg</a>
  - O BEWARE: pre-feedback!
  - DO NOT use it as an example of good prototype!
- Goal: to encourage people to <u>meet each other in person</u> by giving them some <u>offers and discounts</u> on places as «prices»
- Tasks:
  - 1. Finding someone with common interests
  - 2. Getting a discount for a given place
  - 3. Adding a discount for your business

#### **Exercise**

- Phase 1: individual evaluation (~30 minutes)
  - Select 1 task and try to perform it following the flow diagram
  - Keep the list of heuristics in front of you while performing the task and take notes
  - If you find usability problems (you will!), specify which heuristic(s) each problem you found is related to
  - Add a rating for each identified problem by applying Nielsen's severity ratings: 0 = not a problem, 1 = cosmetic, 2 = minor, 3 = major, 4 = usability catastrophe
  - Use the <u>provided template</u> as a guide for conducting the evaluation and taking notes

#### Exercise

- Phase 2: aggregate and find consensus within your group (~10 minutes)
  - Use the same template linked in the previous slide to create a unified report
